AGRADECIMIENTOS

Quiero dejar reflejado en estas primeras líneas mi más sincero agradecimiento a todas las personas que me han acompañado en este recorrido.

En primer lugar a mis directores de tesis, la Dra. Ana Alonso Varona y el Dr. Teodoro Palomares Casado, por darme la oportunidad de trabajar bajo su tutela y por la implicación que han demostrado en el desarrollo de este proyecto, conformando entre ambos un tandem investigador que ha pasado a ser un referente en el cual reflejarme. Igualmente, agradezco a María Díaz Núñez el haberme puesto en contacto con ellos.

En segundo lugar a Cristina, María y Eva porque hacemos un buen equipo, por nuestra cooperación y por tan buenos momentos. Igualmente a todos los colegas de departamento, a los cuales deseo un futuro brillante.

Doy las gracias a los amigos a los que siempre saludo con un abrazo y que me han animado en todo momento. Por supuesto a mi familia, por su consideración y apoyo a la hora de afrontar esta difícil empresa, especialmente a mi padre y a mi madre porque, en cierta medida, la ciencia son los padres.

Agradezco especialmente a Cristina Sobradillo y Ana M^a Tazón Alonso su mecenazgo científico y a Sara García Vega su excelente labor gráfica.

Doy gracias a la Educación Pública por invertir en mi formación, a la Fundación Gangoiti Barrera que, año tras año, defiende a los futuros investigadores y a Histocell SL por su inestimable colaboración en el desarrollo de este trabajo.

Aprovecho la oportunidad para agradecer de antemano a aquellas entidades que aprecien el valor de este estudio y que confíen en mi capacidad profesional, dedicación y compromiso, en un futuro próximo.
