Question # 38

The good farming areas in Umatac are consider those low lands the big low lands close to the river are better than the ones that are way up on the mountains or on the hills the reason for this is because it is fertile that is where the deposits of good soil are examples of these are and those close to the Umatac village farm land those are considered to be good farming areas in Umatac and also close to the ocean the lands at those are good farming areas.

CHARFAUROS' FARMING LANDS

Question # 39

When I was a kid my father farmed at Makajja this belongs to one of my uncles, he owned that and he let my father use it as if he own the land, my uncle still owns the land it is not farmed now and also we farmed at Satanina I remember the corn is about twice my hight, I am 5.10 now and that corn is twice my size aproximately 15 feet or 20 high. it is rich farm land, we farmed a lot in there. Also we farmed close to Mambolanas it is good soil, tarro, and along the hills in the eastern side of Mambolanas.
